

REMARKS

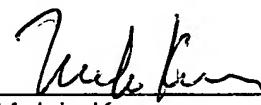

By this amendment, the independent claims which are directed to a biological light measuring instrument have been amended to recite "biological" information rather than "ecological" information in the body of the claims, noting that the specification at page 7, lines 17 and 18 describe preparing a topographic image representation of "biological" information. Accordingly, the amendment corrects improprieties in the claims.

It is submitted the foregoing amendment does not introduce new matter to the application and overcomes improprieties in the claims. Thus the amendment should be entered.
